## **Compatibility of Air Delivery Units and Headtops**

The 3M<sup>™</sup> Speedglas<sup>™</sup> Welding Helmet Series 9100 features breathing tubes with QRS connection (Quick Release Swivel), which enables one-handed connection and release. The SG-30W breathing tube comes standard with most 3M<sup>™</sup> Adflo<sup>™</sup> PAPR HE Systems and 3M<sup>™</sup> Speedglas<sup>™</sup> Fresh-air III Supplied Air Systems. The SG-40W breathing tube is an option for more demanding conditions and also comes standard with complete systems that include the 3M<sup>™</sup> Speedglas<sup>™</sup> Welding Helmet 9100 MP. The SG-50W breathing tube is standard on the 3M<sup>™</sup> Adflo<sup>™</sup> PAPR HE/OV-AG systems.

\* The 3M<sup>™</sup> Speedglas<sup>™</sup> Breathing Tube SG-50W is required when used with 3M<sup>™</sup> Adflo<sup>™</sup> PAPR with HE filter and OV/AG cartridge and 3M<sup>™</sup> Speedglas<sup>™</sup> Welding Helmets 9100-Air or 9100 MP. It is not NIOSH approved with 3M<sup>™</sup> Supplied Air Valves V-Series.
